

# Total Control

## How does KDS deliver savings through total control of Travel and Expense?

KDS provides a single entry point for all users and approvers - from this point there is visibility and control throughout the entire process.

By automating policy from this single entry point you gain more points of control and reduce your overheads:

- **2-5%** overall T&E spend reduction due to enforcement of travel policy alone
- The **elimination** of uncontrolled spend
- **80%** reduction in expense claim audit effort
- **95%** reduction in invoice line reconciliation
- **100%** of expense and invoices correctly cost allocated

We reduce our customers' T&E spend to best-in-class levels by:

- Starting with your business objectives and creating a roadmap to success
- Ensuring policy compliance from the start of the process and closing any loopholes
- Cutting out expense that isn't aligned with your business objectives
- Driving down the cost of all necessary Travel and Expense
- Providing real-time insight to maximize your spending power
- Automating and streamlining your complete T&E lifecycle
- Eliminating duplicate and excessive invoicing
- Auditing your expense process to maximize VAT reclaim and reduce fraud
- Auditing your entire process to be best-in-class

*EADS achieved €5 million annual cost savings with KDS Corporate*

Deliver savings through integrated Travel and Expense and gain total control
