

Travel & Expense Solution for TMCs and Partners

The choice of travel management companies

Enabling TMCs to Bring More Value to their Customers

KDS Portal is the choice of leading travel management companies (TMC) such as American Express and Carlson Waglonlit, delivering state-of-the-art online travel booking to their customers.

KDS Portal offers TMCs all over the world the benefits of reduced internal costs while providing a competitive edge.

- **Comprehensive Inventory Display:** provide your customers with full schedule and fare information for available flights and trains, with an integrated display that shows airlines, low cost carriers and railways all on the same screen.
- **Trusted Advisor:** 'visual guilt' and 'lost savings' views influence buying behaviour and a built in, fully automated approval system means that you can ensure governance of your customers process.
- **Multiple Languages:** provide your customers with their own interface language and currency.

Fast & Flexible

Add value to your customers in record time and minimized implementation costs thanks to a quick and flexible installation pack

- Support for managing multi-level travel policies.
- Using an engine specifically designed for mid-size air travel budgets.
- No software to maintain or update.
- Access to CAT35 fares and built-in fee display.
- Built for worldwide markets, KDS Portal is a global solution which supports 11 languages and over 170 currencies.
- KDS Portal is an independent solution that integrates fully with all major GDS systems, allowing TMCs to change GDS with minimum impact on your customers.
- KDS Portal offers many direct links to LCCs as well as to global and local providers like Hertz, Pegasus, and rail companies.
- KDS Portal allows travelers to book their travel online directly and easily with access to the best and richest choices in air, rail, hotel and car. Meanwhile, relevant information is automatically pushed to users according to the company policy.
- KDS Portal comes with an administration facility that allows the set up of company policies and display settings. This is a graphical, web-based tool that allows for quick integration of additional companies onto your existing platform.
