

KDS' partnerships

KDS has established close partnerships with **technology and content** providers and expense players. Technology and content providers are essential to the performance of KDS products. A travel booking experience is only as good as the content and the reliability of access to this content (GDS, car rental, low-cost carriers, hotel aggregators, etc.)

In addition, KDS partners with over 20 **TMCs**, and has a preferred relationship with the leading global TMCs Carlson Wagonlit Travel and American Express. TMCs are important to KDS for two reasons:

- Our partners have developed a deep expertise of KDS deployment
- TMCs are the largest resellers of our product.

KDS is developing a new range of partnerships for corporate payment and accounting solutions. These partnerships will allow further development of the expense module and processes related to efficient payment and invoicing.

KDS has established close partnerships with technology and content providers and expense players.
